

“WE LEAVE A PART OF
OURSELVES IN EVERY FILM.”

A Small, Highly Specialized Creative Team.

We don't do generic corporate films. We put all of our effort into making our films stand out: direct execution on set, large-format cinema optics on the ground, and custom-built FPV drones in the air.

DIRECTOR OF PHOTOGRAPHY

BOJAN

Large-format cinema optics, deliberate lighting & frame geometry.

FPV DRONE SPECIALIST

TIMON

High-speed indoor lines and dynamic outdoor tracking.

01 / DUALITY OF SCALE

“FROM MILLIMETER
MACRO TO COLOSSAL
SCALE.”

“At the Croatian Mint, security strictly forbade wide shots. The camera was locked entirely to close-up macro optics, capturing coin strikes and metallurgy at millimeter scale. Meridian 16 is the complete opposite: 105 hectares of open horizon and logistics hubs. We bring that exact same effort to both, framing the park to captivate the viewer.”

KEY TAKEAWAY FOR MERIDIAN 16

The close-up macro shots from the mint video are the complete opposite of Meridian 16's scale, but we bring the exact same level of effort to both. We build every frame to captivate the viewer.

Hrvatska Kovnica Novca

Security-restricted production focused on macro metallurgy, coin minting strikes, and human craftsmanship.

02 / WORLD-CLASS FPV SPECIALTY

“CAPTURING MONUMENTAL SPEED & SCALE.”

“We use custom-engineered FPV cinema drones to reveal true scale. Rather than static wide shots, we carve dynamic flight lines from high altitudes down through the park’s vast transit corridors, capturing the magnitude of 105 hectares in continuous, high-speed motion.”

APPLICATION AT MERIDIAN 16

Sweeping high-altitude dives over Atlantic Grupa, Eurospin, and Log Expert One to showcase expansive infrastructure.

FPV Cinema Reel

Dynamic sweeping lines, massive landscape scale, and cinematic high-speed motion across expansive infrastructure.

03 / THE STORY APPROACH

“A 20-YEAR STORY. FROM WETLAND TO REGIONAL GIANT.”

01 / 20 YEARS IN THE MAKING

From Wetland to Regional Giant

A story 20 years in the making: turning raw wetland into one of the largest business parks in the region. Blending your 20-year archive with new 4K frames.

02 / STRATEGIC CONNECTIVITY

Ideal Location & Arteries

Direct access to the A3 and A11 motorway junction, right next to Zagreb Airport. Focusing on seamless transit corridors and ideal regional connectivity.

03 / PASSAGE OF TIME

Sweeping Shadows & Light Trails

Day-to-night dronelapses and stationary timelapses. Sweeping shadows across logistics architecture, followed by long-exposure light trails from cars and trucks.
